LANGUAGE

English

ABOUT ME

I am a Full-stack .NET Web Developer and co-creator of ImaliBooks, a comprehensive bookkeeping software, showcasing a deep understanding of software development. Thrives on building solutions from the ground up and has a keen interest in web development and building maintainable applications. I am a collaborative and innovative person dedicated to creating cutting-edge, secure, and user-friendly software and lastly, I am willing to learn new things.

EXPERIENCE

Full Stack Blazor Developer - Contractor March 2024 – current

Scale Shore Consulting

- Joined Knoxapp project to enhance the UI and implement additional features using Blazor.
- Collaborated with a part-time developer while managing full-time responsibilities.
- Communicated directly with the client, resolving reported bugs and ensuring timely updates.
- Improved site security by implementing various enhancements and managing emergency issues as they arose.
- Managed both the staging and production environments, ensuring smooth deployments and system stability.
- Optimized website performance, focusing on improving load times and overall responsiveness.
- Utilized Azure for cloud infrastructure and MSSQL for database management.
- Testing Security and fixing bugs found.
